To Our Valued Customers:

Thank you for purchasing a Titan Lifts® product. We hope this high quality equipment provides you with years of dependable service.

It is unfortunate that rare situations may occur with the products you purchase from Titan Lifts®. We value your business as well as the trust you have and need to maintain your relationship with us. Titan Lifts® carries liability coverage that may protect our customers if a situation does occur. However, as in all accidents there must be proof of liability for a claim to be made. Our insurance company requires the following procedures be observed in order to consider a claim:

- A. The claimant must contact the Titan Lifts® distributor immediately with the facts of the situation.
- B. If any equipment is damaged, including vehicles or shop equipment, Titan Lifts® must be given the opportunity to send an impartial representative to the site for proper assessment of the situation.
- C. The Vehicle cannot be moved until either an impartial representative has reviewed the accident or clear and precise pictures are taken that reflect all the pertinent information for an impartial representative to be able to access the information from a distance. Titan Lifts® or its representatives must approve the pictures before anything can be moved.
- D. If any potential liability is determined on behalf of Titan Lifts®, two estimates must be submitted for damages to be reimbursed.

It is imperative that the claimant complies with these procedures, because without proper assessment of the situation a claim will be denied.

ARBITRATION NOTICE

The installation or use of this equipment shall constitute an acknowledgement that the user agrees to resolve any and all disputes or claims of any kind whatsoever, which relate in any way to the equipment, by way of binding arbitration, not litigation. No suit or legal action may be filed in any state or federal court. Any arbitration shall be governed by the Federal Arbitration Act, and administered by the American Mediation Association, Indianapolis Indiana. The maximum amount that an arbitrator may award and all damages shall not exceed the retail value of this equipment.

WARRANTY NOTICE

This equipment must be installed by a "Professional Installer" assembled and used in the manner according to the documentation provided to be covered by warranty.

Damaged or missing components must be reported within 72 hours of receipt to your freight carrier and to the distributor. Claims must be filed to cover cost.

If you have any questions or if we can be of any further assistance, please don't hesitate to contact a Titan Lifts® representative at 1-888-908-4826. Thank you for the opportunity to continue to serve your lift equipment needs.

INSTRUCTIONS

 **WARNING:** READ ENTIRE MANUAL AND COMPLY WITH ALL SAFETY AND SERVICE PRECAUTIONS. DEATH, PERSONAL INJURY AND / OR PROPERTY DAMAGE MAY OCCUR IF INSTRUCTIONS ARE NOT FOLLOWED CAREFULLY.

UNPACKING AND SET-UP *REFER TO PARTS LIST FIG. 1

1. Carefully unpack the lift making sure that all of the parts have been included.
2. Remove the lift and all parts from delivery pallet and place on a clean, solid flat surface.
3. Take end of black Air Hose (55) and attach to Pneumatic/Hydraulic Pump Assembly (67).
4. Raise the lift with Pump Foot Pedal (58) to expose the top of Casters (22). Note: If the lift is not raising level, check to make sure that the Wheels (42) are in their tracks.
5. Use the provided Allen wrench and place in top of Casters (22) and turn it clock-wise. Lower all four casters until the lift rolls freely.
6. If using the Front Extension (9), slide the Front Extension over the front of the Deck Plate. Use the second and third Connecting Bars (5) and secure to the Deck Plate with the Quick Pins (3) or use Short Connecting Bar (68) without Side Extensions.
7. If using Side Extensions (7) then use the Connecting Bar (5) to assemble the Side Extensions (7) to the Deck Plate (8) securing them with the Quick Pins (3). Slide the Side Extensions (7) to the Deck Plate (8).
8. Take Ramp Stands (43) and screw into Bottom Ramps (44) (45) and (46). Place the Extension Ramp (47) over matching holes on the Center Ramp (45).
9. Take the Fixed Clamp (10) and bolt to location "B" on the Deck Plate (8) or Front Extension (9) Using Bolts (11), Washers (12), Lock Washers (13), and Nuts (14).
10. Take the Crank Assembly (69) and bolt to location "C" on the Deck Plate (8) or Front Extension (9) using Bolts (11), Washers (12), Lock Washers (13) and Nuts (14). Bolt Moveable Clamp (16) to Crank Assembly (69) using the provided Bolts (71).
11. Insert the Tire Stop (15) onto the Fixed Clamp (10) using the Pin (60).
12. Place Stands (1) on holes located on the end of the Deck Plate (8).
13. If you have access to compressed air, attach air nozzle to compressed air hose and raise the lift by pressing lever on air nozzle. Requires 70-160PSI.
14. If necessary, raise or lower the Adjustment Legs (6) to make the lift Deck Plate (8) level with the Ramps.

 **Note:** The Stands (1) are for holding up a motorcycle with rear wheel removed. (Straps not provided but should be used).

 **Note:** Standard Dropout Plate (2) can be removed for easy rear wheel removal.

 **Note:** Roller Dropout Plate (4) can be installed after motorcycle is loaded for easy rear wheel cleaning or maintenance.

 **WARNING:** Roller Dropout Plate (4) must be removed prior to unloading the motorcycle from the lift & replaced with the Standard Dropout (2). Do NOT operate motorcycle on Roller Dropout (4). Roller Dropout (4) is NOT to be used as a dyno device.

OPERATION & MAINTENANCE

***REFER TO PARTS LIST FIG. 1**

*** Test the lift several times for proper operation before attempting to lift a load.**

1. Raise Casters (22) to lower lift off Casters (22) onto solid surface.
2. Roll motorcycle onto Deck Plate (8) until Wheel is inside the Clamp (10 & 16).
3. Tighten the Clamp to the tire by using the crank handle on the Moveable Clamp (16).
4. Load must be centered on the table at all times.
5. Load must be firmly positioned and secured on the table at all times.
6. To raise the lift manually, pump foot pedal until you reach the desired working height or connect to a 90-160 PSI air supply.
7. **WARNING:** Do NOT raise the Deck Plate (8) higher than the highest locking position.
8. To raise the lift using compressed air, use airline trigger until you reach the desired working height.
9. **IMPORTANT:** After reaching the desired working height, make sure the Handle (27) is down in order to make the Safety Plate (61) set in the safety lock for your protection.
10. Press the Foot Pedal Release (50) to set the Safety Plate (61) into the safety lock position.
11. When finished working, raise the lift to release pressure off the Safety Plate and pull the Handle (27) up, and then step on Foot Pedal Release (50) to lower the lift.
12. All moving parts have been lubricated at the factory and should be re-lubricated before the first use and at least once every six months to prevent damage.
13. Lightly oil cylinder rod at least once every six months or when it becomes dry.
14. Do NOT use this product if worn or damaged. Examine lift for structural cracks, bends, or other signs of damage prior to each use. Check all hoses and connections before each use to ensure proper working condition.
15. Keep lift clean, dry, and well maintained to extend longevity of the product.
16. If the lift does not appear to be working properly, follow bleeding instructions, pg 10.

 **WARNING:** Do NOT load the motorcycle onto Deck Plate (8) with the Roller Dropout (4) installed. Use the Standard Dropout Plate (2) when loading motorcycle.

 **WARNING:** Handle (27) should be moved down all the way when the lift is in the raised position and the Safety Support Plate (61) locked so the lift will not lower.

WARNING

The warnings, precautions and instructions in this manual cannot cover all possible conditions and situations that may occur. The operator must understand that the operator must supply common sense and examine caution factors when using this product to determine safety in all circumstances being used.

SAFETY PRECAUTIONS

1. Load should not exceed rated capacity for this lift - 1500lbs
2. 90-160PSI shop air needed. Do NOT exceed the 160 PSI rating.
3. Make sure the handle is in the down position and the safety plate is set in the safety lock while the lift is in the raised position.
4. Move the lift only when it is lowered.
5. Do NOT ride vehicle onto lift.
6. Only trained people should operate the lift.
7. Air/Hydraulic pump should be at least 3 feet away when operating. Remain clear of the lift when raising or lowering.
8. Indoor use recommended.
9. Do NOT move lift while loaded.
10. Keep hands, tools and other extremities from under carriage and moving parts.
11. Maintain a safe working environment. The work area should be clean, dry, clutter free, and sufficiently lit.
12. Wear proper ANSI-approved safety attire. Do NOT wear loose fitting clothing while operating lift, long hair and sleeves should be secured.
13. Keep children and bystanders away from work area. Do NOT let children operate or play on lift.
14. Do NOT use if under the influence of drugs or alcohol. Operator must be alert at all times when using heavy lift equipment.
15. Never operate the lift with someone on it.
16. Do NOT adjust safety valve.
17. Use this lift only for the work it is intended. Do NOT use this product for an application for which it was not designed. Misuse can lead to personal injury and/or property damage.
18. Industrial applications must follow OSHA requirements.
19. Do NOT use for aircraft purposes.
20. Have your lift serviced by a qualified repair person using only identical Titan Lifts[®] replacement parts and attachments. This will ensure that the safety of the lift is maintained.

PLEASE READ THE FOLLOWING CAREFULLY

THE MANUFACTURER AND/OR DISTRIBUTOR HAS PROVIDED THE PARTS LIST AND ASSEMBLY DIAGRAM IN THIS MANUAL AS A REFERENCE TOOL ONLY. THE MANUFACTURER OR DISTRIBUTOR DOES NOT MAKE ANY REPRESENTATION OR WARRANTY OF ANY KIND TO THE BUYER THAT HE OR SHE IS QUALIFIED TO MAKE ANY REPAIRS TO THE PRODUCT, OR THAT HE OR SHE IS QUALIFIED TO REPLACE ANY PARTS OF THE PRODUCT. THE MANUFACTURER AND/OR DISTRIBUTOR EXPRESSLY STATES THAT ALL REPAIRS AND PARTS REPLACEMENTS SHOULD BE PERFORMED BY CERTIFIED AND LICENSED TECHNICIANS, AND NOT BY THE BUYER. THE BUYER ASSUMES ALL RISK AND LIABILITY ARISING OUT OF HIS OR HER REPAIRS TO THE ORIGINAL PRODUCT OR REPLACEMENT PARTS THERETO, OR ARISING OUT OF HIS OR HER INSTALLATION OF REPLACEMENT PARTS THERETO.

Product's Serial Number: _____

Note: If product does not have a serial number, record the month and year of purchase instead.

Note: Some parts are listed and shown for illustration purposes only, and are not available individually as replacement parts.

CHECKING & FILLING HYDRAULIC FLUID

1. Lower the lift completely. Remove the breather valve (35) and filler plug (28).
2. The oil level should be even with the bottom of the filler plug hole. You should be able to see the oil.
3. If the fluid level is low, add SAE hydraulic jack fluid only. **Do NOT use any other fluid or brake fluid.**

BLEEDING

Note: If the lift appears not to be working properly, it may be necessary to bleed trapped air from the hydraulic system.

1. Check fluid level. Replace plug.
2. Depress and hold release foot pedal (50).
3. Pump the foot pedal (58) several times while depressing the release foot pedal.
4. Let up on release foot pedal (50).
5. Pump the lift pedal (58). If the lift does not elevate smoothly or pedal (58) feels “spongy”, repeat steps 2-5.
